

UI Developer

This is a core development position that involves architecture, design, and implementation of our UI. The UI is used to support dashboards and drilldown of security information for both our Security Operations Centre and end clients. It is also used to perform data analytics and reporting. There are opportunities available to contribute to product roadmap.

Requirements:

- scripting languages, web frameworks, Javascript, AJAX, SQL
- demonstrated skill in AJAX, and working with client/server models
- demonstrated development experience
- B.S. in Computer Science or similar experience
- Strong communication skills (oral and written)
- Comfortable in a team environment
- Located in Cambridge, Ontario
- References and a criminal background check are required.

Desired:

- Python, and familiarity and experience with Python frameworks for UI and ORM
- demonstrated skill with UI application development
- some architecture/design experience
- 3+ years experience
- web game development
- distributed programming experience
- C/C++ experience
- other languages

In addition to our competitive compensation packages, we have an employee benefits program, employee assistance program and a generous stock option plan. Our offices are based in Cambridge, conveniently located close to Hwy 401.
