

Managed Endpoint Defense Powered by CB Defense

esentire® | Carbon Black.

TRADITIONAL ANTIVIRUS IS NOT THE CURE

THE CHALLENGE

Endpoints are among the most popular targets for sophisticated threat actors. Hackers know they can bypass traditional antivirus solutions while avoiding detection and establishing control.

64% of organizations had endpoint attacks that successfully compromised assets and/or infrastructure in the last 12 months

76% of organizations are using traditional antivirus to protect their endpoints

Only 15% of organizations have replaced traditional antivirus with next-gen antivirus

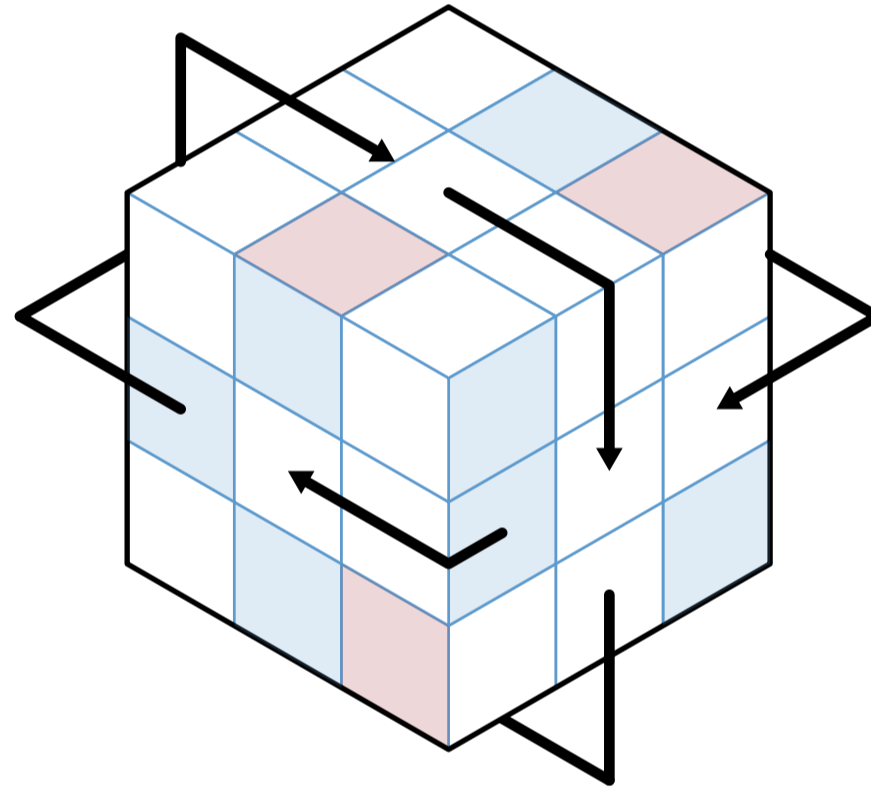

Source: Ponemon Institute, State of Endpoint Security Risk, 2018.

OPTIMIZED DEPLOYMENT WITH CONTINUOUS ADAPTATION IS CRITICAL

THE NEED

Visibility and continuous adaptation are critical. However, many organizations struggle with sufficient resources to deploy and continuously tune and adapt endpoint protection to address the evolving threat landscape.

41% of organizations say their biggest challenge with antivirus is complexity, deployment and management

65% of organizations say frequency of tuning/patching is challenging or extremely challenging

Only 40% of organizations believe they have ample resources to minimize IT endpoint risk due to infection or compromise

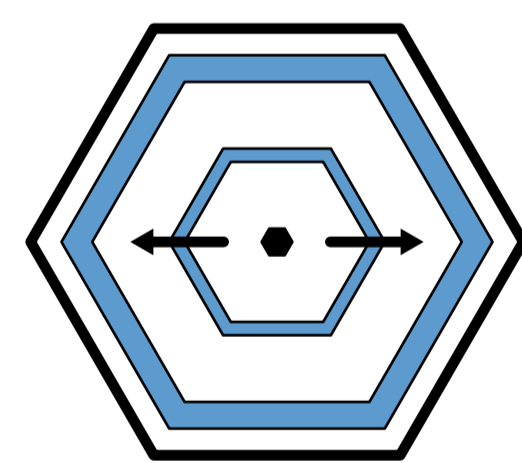

Source: Ponemon Institute, State of Endpoint Security Risk, 2018.

DON'T JUST UPDATE. ADAPT.

THE SOLUTION

Managed Endpoint Defense, powered by CB Defense, delivers next-generation prevention with continuous adaptation and hardening by eSentire security experts.

DEPLOY AND HARDEN.

Rapidly deploy and optimize endpoint prevention with dedicated security experts that continuously refine and harden rules and policies that account for your unique threat landscape.

PREDICT AND PREVENT.

Block known, unknown, and file-less attacks leveraging predictive modeling with integrated threat intelligence and expert-driven continuous threat tuning.

RESPOND SWIFTLY.

Reduce mean time to response with attack chain visualization and integrated endpoint isolation capabilities that prevent lateral spread and business disruption.

esentire®

eSentire is the largest pure-play Managed Detection and Response (MDR) service provider, keeping organizations safe from constantly evolving cyber-attacks that technology alone cannot prevent. Its 24x7 Security Operations Center (SOC), staffed by elite security analysts, hunts, investigates, and responds in real-time to known and unknown threats before they become business-disrupting events. Protecting more than \$6 trillion in corporate assets, eSentire absorbs the complexity of cybersecurity, delivering enterprise-grade protection and the ability to comply with growing regulatory requirements. For more information, visit www.esentire.com and follow @eSentire.

Carbon Black.

Carbon Black (NASDAQ: CBLK) is a leading provider of next-generation endpoint security delivered via the cloud. Leveraging its big data and analytics cloud platform – the CB Predictive Security Cloud – Carbon Black consolidates prevention, detection, response, threat hunting and managed services into a single platform with a single agent and single console, making it easier for organizations to consolidate security stacks and achieve better protection. As a cybersecurity innovator, Carbon Black has pioneered multiple endpoint security categories, including application control, endpoint detection and response (EDR), and next-generation antivirus (NGAV) enabling customers to defend against the most advanced threats. More than 4,600 global customers, including one-third of the Fortune 100, trust Carbon Black to keep their organizations safe.
